Use Old Logo please.

Can we show the complete name of the app here?

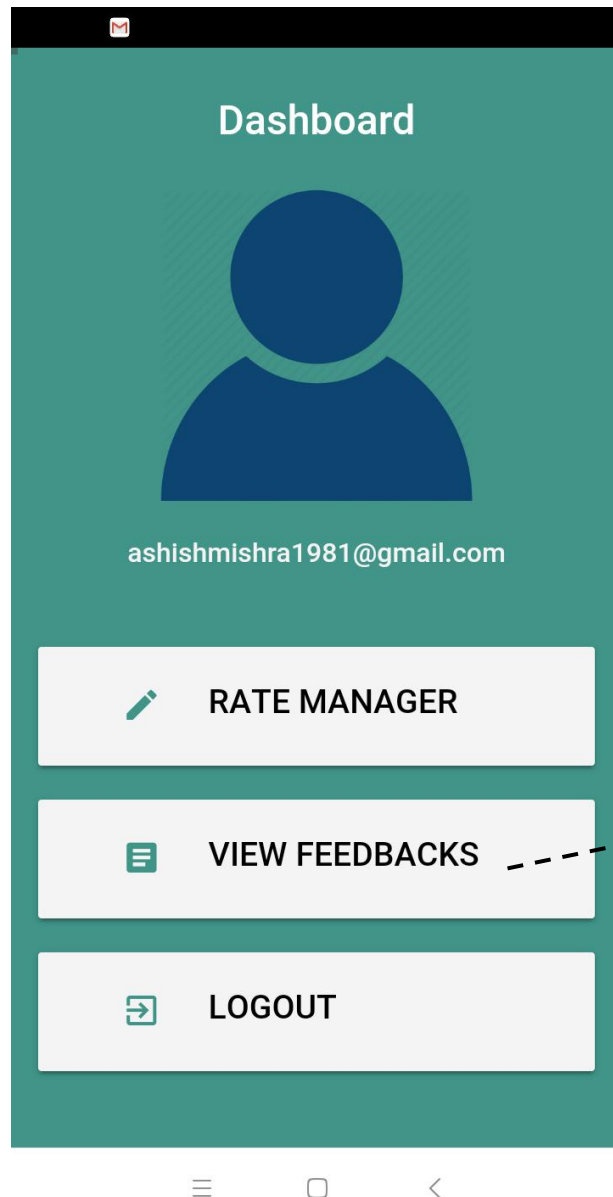

Can we use Facebook and LinkedIn plugins???

**Clarifying Question for you**

**Do we have to pay some money to Facebook or LinkedIn to add those plugins here?**

**Yes, we can integrate linkedIn and facebook APIs for login, they are free to use. Please discuss with Mr. Puneet regarding this, I've explained to him.**

Can we add a screen here which would explain what is Irate my manager and why someone should provide us the information? I can provide the material.

Call it "Insights" please

Please provide the material, will add it.

The screenshot shows a mobile app interface. At the top, a teal header bar contains a back arrow and the word "Feedback". Below this, the text "Manager Behaviour" is crossed out with a large black 'X'. A white card titled "My Manager is Mostly:" contains six checkboxes arranged in a 3x2 grid. Below the card, there is a paragraph of text about user confidentiality and a teal "NEXT" button at the bottom.

← Feedback

~~Manager Behaviour~~

**My Manager is Mostly:**

<input type="checkbox"/> Friendly	<input type="checkbox"/> Angry
<input type="checkbox"/> Neutral	<input type="checkbox"/> Busy
<input type="checkbox"/> Lazy	<input type="checkbox"/> Partial

IRate My Manager is committed to maintain user confidentiality.  
Information provided by the user is kept confidential.

NEXT

→ Change it to " My Manager" Keep this on all pages where questions are asked

→ Keep "Behaviour"  
Delete "Manager"  
Similary remove "Manager" from all the pages with questions

→ Can we add this text now ?

← Feedback

Personal Details

**Tell about yourself:**

Company:

Industry:

Company Location:

Company Size: ▼

Designation: ▼

Age group: ▼

Gender: ▼

Change it to “Tell us about your Self”

Can we add some search assistant here? So if someone is searching for say known company dont have to type the name?

Can we add list of industry here so that one does not have to type it? I can provide you that.

Search Assitant required

**We cannot have search assistant but a select box with predefined values which you can provide me and user will select one of the value like we do in age group field.**

That might not serve the purpose. There are thousands of companies, by doing so user will have to go through entire list. Can you provide me a list of solutions available to solve this problem.

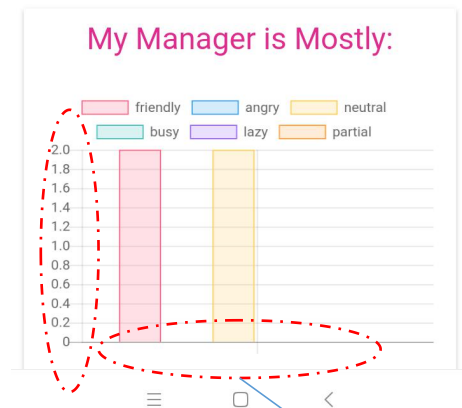

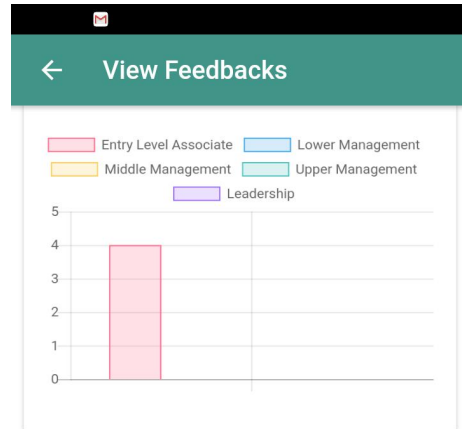

Also my other concern with this is - if someone by mistake misspell a company name for example Amazon, is misspelled by someone as "Amzon" then as per the current settings the database will have both the values.

This can be done for the industry as they are predefined but not for the companies. Kindly think of a solution for it.

Insights

1 = Strongly Disagree

5 = Strongly Agree

(Correct Scale 0- 5)

Legends should be there

Please make these charts

1) Manger (Avg Ratings) by Level

2) My Manager is Mostly (Average Rating) - Show the legends just the way shown in the charts

2) It's a mobile screen so we cannot adjust titles just below or side the bar, we are showing them above charts. I think that solves the problem.

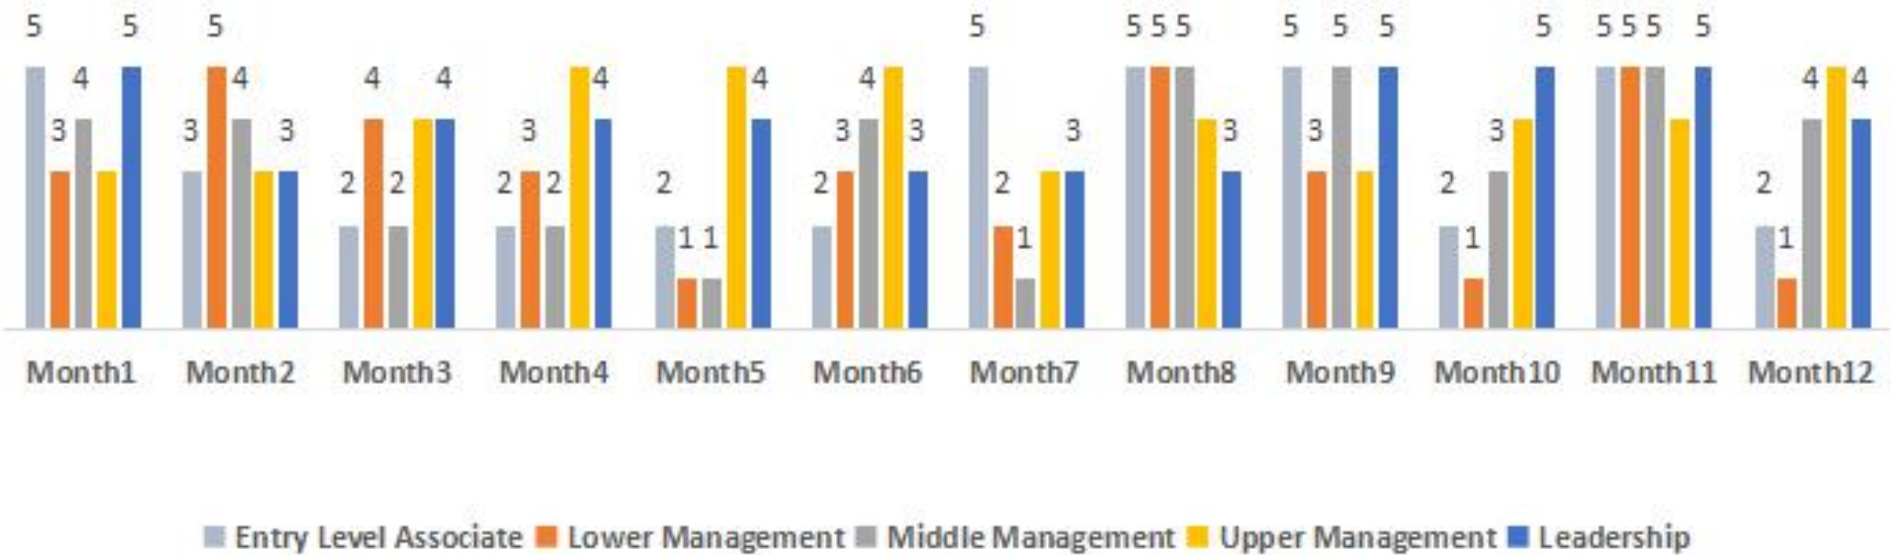

Can we have the graphs without showing scales on the axis? If you want to keep the scale then keep from 0 - 5

Changed axis scale to 1-5

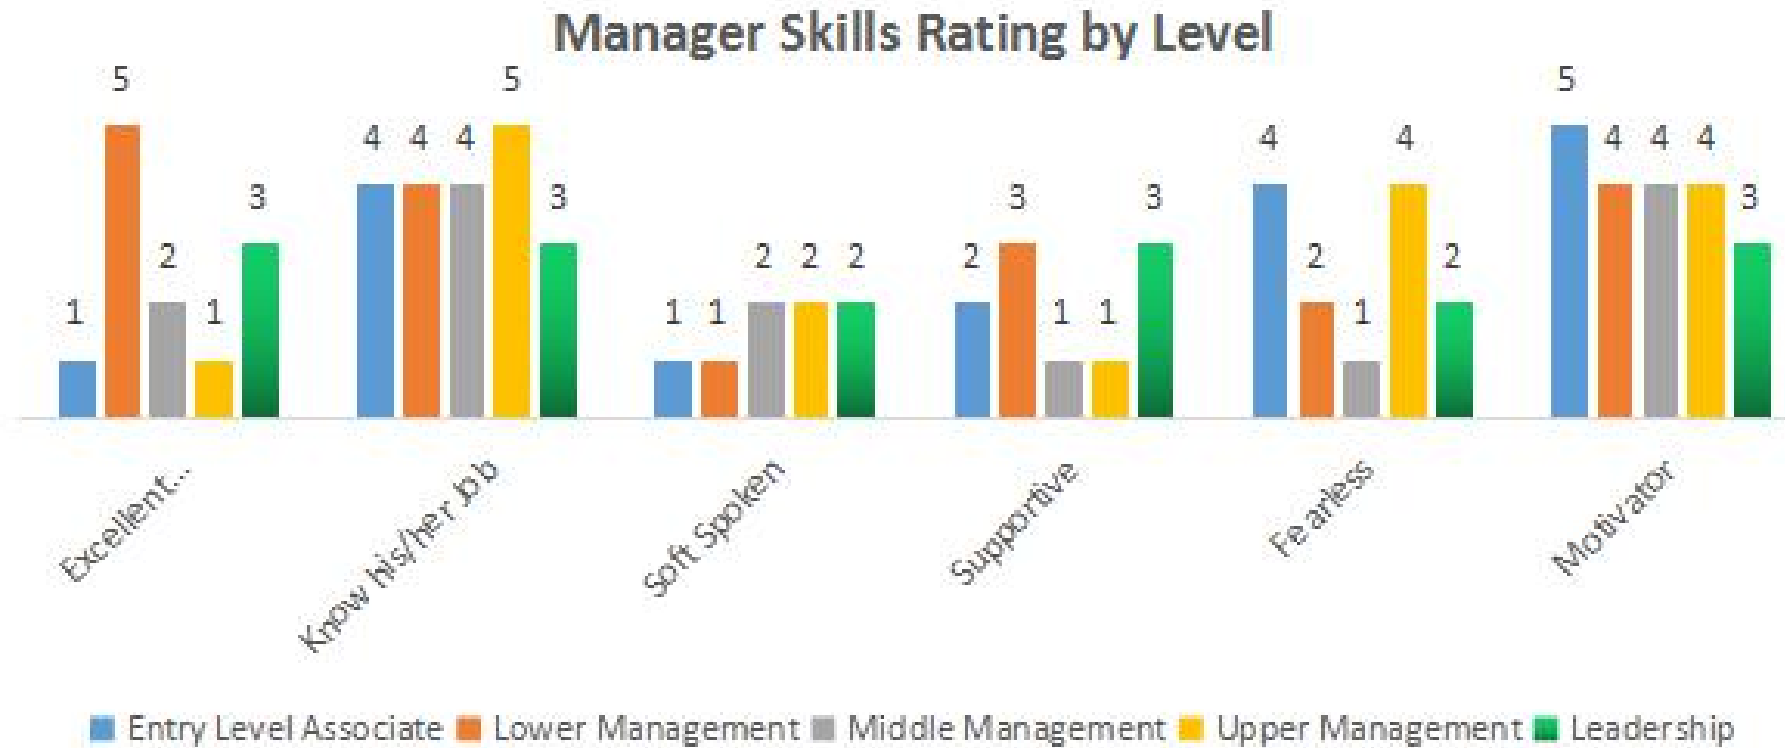

Not able to understand what you are saying. Please show me an example then I can understand.

Keep it 0 - 5. because if you start with 1 and a user rated 1 then that bar would not show up.

Average Rating Manager (Monthly Comparison) by Level

All levels cannot be accommodated in one graph so we can create 5 charts denoting each level. Also, please mention each step of how the average will be calculated since rating is in terms of fields (Strongly agree, agree, etc.) and the workflow for this chart.

Can you try to figure out how to do it? It is a simple cross tabulation. Can you show me alternate charts on an excel sheet which you can show on the mobile screen as well. I would be in a better situation to guide you then.
